Experience

Software Developer

June 2022 – Present

Epic Systems

Verona, WI

- Investigated and implemented fixes for existing functional issues by collaborating with an interdisciplinary team of developers, testers, and customer-facing roles
- Enhanced workflows for clinicians working in procedural specialties by reducing required clicks and consolidating documentation tools
- Reviewed proposed code changes and designs from other developers to ensure proper code quality and prevent issues in cross-app functionality
- Supported a team of forty developers through a transition from SVN to Git version control by completing additional troubleshooting training and holding daily office hours
- Traveled to customer sites to aid end-users as they installed a new cardiology application as well as gain an understanding of their work environment and challenges

Software Engineering Intern

May 2021 – August 2021

Plexus Corp

Neenah, WI

- Developed software updates for embedded systems used by medical device manufacturers
- Evaluated existing product requirements and created software verification test procedures to provide a reliable quality standard for an integrated system
- Improved development workflows by migrating source code repositories from SVN to Git and creating project-specific virtual environment configurations

Optometric Technician

May 2020 – August 2020

Your Eye Care Team

New Holstein, WI

- Coordinated with a team to efficiently perform comprehensive eye health examinations and provide high-level medical eye care
- Assisted optometrists by completing pre-exam testing for visual acuity and eye health
- Maintained proper HIPAA procedures and security guidelines to safeguard patient confidentiality

Education

Michigan Technological University

September 2018 – May 2022

BS Computer Engineering · 3.93 GPA · Dean's List

Houghton, MI
